

# Teamwork Reflection Report

## Overview

Reflecting on our recent project, we can confidently say that this was one of the best teamwork experiences we have had. Our group consisted of Seijung, Tursunai, Afag, Rishika, and Lucy. Each team member brought their unique strengths and worked with the highest level of professionalism, communication, and support. This report evaluates the team's functioning, highlights individual contributions, and incorporates feedback discussed during our reflection session.

## Team Functioning

Our team's success can be attributed to the following principles:

1. **Clear Communication:** We maintained open channels of communication through WhatsApp and Slack, ensuring everyone was informed and updated.
2. **Defined Roles and Responsibilities:** Each member took on specific tasks based on their expertise, which avoided confusion and duplication of efforts.
3. **Support and Collaboration:** The team fostered a culture of mutual support, where no one hesitated to offer or seek help.
4. **Accountability:** Everyone was committed to their deliverables, and progress was reported regularly during meetings.

## Key Achievements

- **Productivity:** Every member contributed productively, ensuring the timeliness of project milestone completion.
- **Professionalism:** Execution and reporting were handled with professionalism.
- **Positivity:** The team created an encouraging and supportive environment, making the collaboration extremely effective and fun.

## Individual Peer Evaluations

[Seijung's Reflection](#)

[Tursunai's Reflection](#)

[Afag's Reflection](#)

[Rishika's Reflection](#)

[Lucy's Reflection](#)

## Seijung's Reflection

### Lucy

- **Positive Attributes:** Lucy has been a key asset to the team throughout the project. Her involvement in all meetings in person allowed for smoother and more efficient collaboration. She is an excellent communicator, always facilitating discussions and providing valuable feedback. She demonstrated great flexibility by transitioning seamlessly between tasks, completing each one before moving on to the next. Additionally, her reliability stood out, particularly in the load test portion of the project, where she showed perseverance and patience in running multiple trials to ensure the accuracy of our quantitative assessments. Lucy is also incredibly helpful, always offering to assist others and ensuring that all tasks were covered.
- **Areas for Improvement:** While Lucy has been an outstanding team player, I believe she could take on a more prominent leadership role in future projects. She could actively step into leadership positions, offering more guidance to teammates and helping shape the overall direction of the work. In addition, while Lucy is excellent at providing feedback on others' work, I encourage her to share more proactive feedback with the team, helping to foster an even more collaborative atmosphere.

### Tursunai

- **Positive Attributes:** Tursunai made significant contributions, particularly in the early stages of the project when we were brainstorming the architecture for our microservice. Her input was instrumental in shaping our approach. She also took charge of organizing the team by scheduling meetings and diligently taking meeting notes, keeping everyone on track. Tursunai demonstrated impressive attention to detail and organization throughout the process. Her work on implementing the LLM portion of the project was particularly noteworthy, as it required a steep learning curve and a great deal of self-driven research. Her reliability in completing this complex task was essential to the success of our project.
- **Areas for Improvement:** Although Tursunai's work was mainly independent, I believe that in future projects, she could benefit from providing more feedback to her teammates. While she worked diligently on her own tasks, engaging in more feedback loops and soliciting input from others could help integrate her efforts even more closely with the team's overall progress. Additionally, it might be helpful for her to actively seek out more collaboration from others or ask for feedback on her work to foster a more interactive team dynamic.

### Afag:

- **Positive Attributes:** Afag played a critical role in the success of our project, particularly in terms of logistics. She took responsibility for setting up and maintaining our GitHub repository, ensuring our work was well-organized and easy to access. Afag also managed the extraction of the dataset and the integration of the RDS, which was a time-consuming and complex task. Her dedication and hard work in completing this

process were invaluable to the team. Beyond her technical contributions, Afag was an excellent team player, always ready to assist teammates who encountered roadblocks and offering support when needed.

- **Areas for Improvement:** Afag could benefit from taking more initiative in providing regular progress updates, particularly on tasks she is leading. While she is highly reliable and always willing to help others, providing more visibility into her work would further enhance team coordination. In addition, Afag might consider taking on more leadership responsibilities in future projects, using her technical expertise to guide the team more actively and contribute to strategic decision-making.

#### **Rishika:**

- **Positive Attributes:** Rishika was a highly responsible and creative member of our team. She played a key role in deploying our application on the app runner, ensuring that it ran smoothly and efficiently. Her creative ideas helped us refine the front end of the application, significantly improving its user experience. Rishika was also an active communicator, regularly providing feedback to the team and keeping everyone updated on progress. She ensured that the team was aware of any remaining tasks and communicated effectively when errors occurred on the app runner, taking swift action to resolve them and keep the project on track.
- **Areas for Improvement:** While Rishika has been a strong contributor to the team, she could further improve by providing more frequent updates on her progress. Regular updates would help maintain alignment across the team and allow for quicker identification of potential roadblocks. Additionally, Rishika has demonstrated strong reliability and collaboration skills, and I encourage her to take on more leadership roles in future projects, as she has the potential to guide the team and help drive key decisions.

## **Tursunai's Reflection**

Peer Evaluation:

#### **Rishika**

- **Positive Attributes:**
  1. Excellent organizational skills, ensuring smooth workflows.
  2. Strong technical expertise that enhanced the quality of deliverables.
  3. Proactive in identifying and solving problems.
- **Areas for Improvement:**
  1. Could further empower the team by delegating tasks strategically, showcasing excellent leadership potential.
  2. Might refine decision-making speed while maintaining her exceptional thoroughness.
  3. Could use her outstanding analytical skills to mentor others on time management.

## Seijung

- **Positive Attributes:**
  1. Strong attention to detail, ensuring high-quality outcomes.
  2. Clear and concise communicator, essential for progress updates.
  3. Always willing to assist others with their tasks.
- **Areas for Improvement:**
  1. Could bring even more value by sharing her brilliant ideas more actively during brainstorming sessions.
  2. Has the potential to become even more assertive, complementing her already excellent collaboration skills.
  3. Could expand her toolkit by exploring innovative methods, further enhancing her impact.

## Lucy

- **Positive Attributes:**
  1. Creative thinker, contributing great ideas to the project.
  2. Adaptable and quick to adjust to changing requirements.
  3. Enthusiastic and positive, boosting the team.
- **Areas for Improvement:**
  1. Could leverage her creativity by enhancing technical documentation to inspire others.
  2. Might structure her ideas in an even more impactful way, building on her incredible adaptability.
  3. Has the potential to shine further by perfecting her prioritization strategies, complementing her enthusiasm.

## Afag

- **Positive Attributes:**
  1. Exceptional problem-solving skills, especially under tight deadlines.
  2. Dependable and consistently delivers on promises.
  3. Encouraging and supportive team member.
- **Areas for Improvement:**
  1. Could expand her already impressive skill set by focusing on leadership development.
  2. Might bring even more clarity by sharing updates proactively, enhancing her remarkable dependability.
  3. Could refine her exceptional presentation skills to become even more influential.

## Afag's Reflection

Peer Evaluation:

Seijung

**Positive Attributes:** Throughout our project, Seijung emerged as a technically skilled and adaptable team member who consistently demonstrated exceptional problem-solving capabilities. Her expertise in designing the Flask app and CI/CD pipeline was remarkable, with an ability to quickly resolve complex technical challenges that often seemed insurmountable. Seijung's collaborative nature stood out, as she was always willing to extend support beyond her primary responsibilities, helping teammates and maintaining the project's momentum.

**Areas for Improvement:** While her technical skills are impressive, she could benefit from providing more frequent and comprehensive updates about her work. Her tendency to solve problems independently sometimes means the team misses out on her valuable insights.

Tursunai

**Positive Attributes:** Tursunai emerged as a strategic thinker and motivational leader throughout our project. Her critical role in mapping out the project's architecture and maintaining a comprehensive perspective was invaluable. Particularly impressive was her work on the LLM portion, which demonstrated remarkable self-driven research, persistence, and technical capability. Tursunai's constantly encouraging attitude and ability to celebrate team progress while actively seeking ways to support teammates created a positive and collaborative team environment.

**Areas for Improvement:** Her technical discussions could benefit from more detailed explanations, providing deeper insights into her research and decision-making process. Although she is supportive, she could increase her engagement by offering more substantive and frequent feedback to teammates. Developing a more systematic approach to sharing the technical knowledge and skills acquired during her research would not only benefit individual team members but also strengthen the team's collective capabilities.

Lucy

**Positive Attributes:** Lucy proved to be an invaluable team member, characterized by her remarkable reliability, dedication, and exceptional communication skills. Her approach to the project was marked by a proactive attitude, seamlessly transitioning between tasks and taking ownership of critical responsibilities like load testing and documentation. Lucy's ability to facilitate discussions and provide constructive feedback was crucial in maintaining team alignment and ensuring we met all project requirements.

**Areas for Improvement:** Despite her strengths, Lucy has room to grow in terms of leadership and communication depth. While she is an excellent team player, she could benefit from taking more initiative in steering the team's direction and providing more structured insights during discussions. Her ideas, while valuable, could be presented with greater clarity and strategic thinking.

Rishika

**Positive Attributes:** Rishika distinguished herself as a technically proficient and creative team member, bringing innovative solutions to our project. Her expertise in deploying the application on the app runner and her creative approach to improving the front-end user experience were standout contributions. Rishika's communication skills kept the team informed about progress, and her ability to quickly address and resolve issues demonstrated her technical acumen and problem-solving capabilities.

**Areas for Improvement:** However, Rishika can continue to develop her professional skills by focusing on more consistent communication and leadership development. While she is already a strong communicator, providing even more frequent and detailed updates would further improve team coordination. Her technical skills and creative approach position her perfectly to take on more leadership responsibilities, but she could benefit from developing her ability to strategically delegate tasks and guide team decision-making. By refining her approach to sharing ideas and taking a more active role in strategic discussions, Rishika can leverage her considerable talents to become an even more impactful team member.

## Rishika's Reflection

Peer Evaluation:

Seijung

**Positive Attributes:** Seijung is very technically skilled and adaptable. She was always willing to pivot from one task to the next in order to help the team, and was always asking how she could support other team members and pitch in with components outside of what she was already working on. Seijung designed many critical aspects of the Flask app and the CI/CD pipeline, and was able to quickly resolve blockers not only in these spaces but in other areas as well. You could always count on Seijung to produce high-quality work. I appreciated her quick thinking, helpful attitude, and ability to think ahead about what the next phases of design and the resulting tasks would look like.

**Areas for Improvement:** Given her strong technical skills, Seijung could work on providing a greater amount of constructive feedback to the rest of the team on their code, providing more frequent updates on her progress, and sharing more of her technical knowledge.

Tursunai

**Positive Attributes:** Tursunai is a great leader and had a big role in mapping out the original architecture of our system. She was able to keep the big picture in mind and spent time meeting with TAs to get their opinions on how we could execute our ideas. Tursunai always had an encouraging attitude in meetings, celebrating our team's progress and asking how she could help us with our tasks. She took ownership over the LLM portion of the project, which was a tricky task, and persevered when it came to refining the responses and looking for out-of-the-box ways to handle errors. I appreciated the way she provided several updates on her progress and motivated the team throughout the project.

**Areas for Improvement:** Given her leadership abilities, Tursunai can work on adding more detail when explaining her thinking during meetings, providing more feedback to teammates, and sharing the technical skills gained in her research more often.

Afag

**Positive Attributes:** Afag is a wonderful team player with a strong sense of perseverance. She worked on configuring RDS both manually and through Cloud Formation, which took several hours and debugging sessions due to various access issues and other blockers we were facing, but maintained a positive attitude throughout. She is also very organized and did an excellent job of proactively setting up our GitHub repository. Afag was always looking for ways to contribute to the team, and once she completed a task would be ready to jump onto the next one. I appreciated her grounded attitude, clear thinking, and sense of calmness when approaching the tasks at hand.

**Areas for Improvement:** Giving her perseverance and positive attitude, Afag can improve on providing more feedback to team members on their work, explaining the technical aspects of her work more frequently, and sharing more details about the roadblocks being encountered.

Lucy

**Positive Attributes:** Lucy is a very diligent and detail-oriented teammate. She was always thinking one step ahead about how we could work towards accomplishing our overarching goals, and was very proactive about picking up pending tasks in various different areas, never hesitating to take on new challenges that she was unfamiliar with in order to support the team. Lucy is a very dependable person to work with, and has a strong sense of timeliness, which she exhibited while taking ownership over load testing and documentation. I appreciated her approach to moving the team forward, organizing the big picture of our work so that all requirements were met, and enthusiasm towards collaboration within the team and during office hours.

**Areas for Improvement:** Giving her diligence and commitment to our project, Lucy can improve on structuring her ideas better, communicating her blockers more frequently, and presenting her design ideas more often in meetings.

## Lucy

Peer Evaluation:

Seijung

a. 3 Positive

- i. Conscientious. Seijung takes her work seriously and that is something I appreciate.
- ii. Technical Strength. Seijung is able to solve difficult problems with her knowledge.
- iii. Attention to Detail. Seijung is quick to catch problems in the code.

b. 3 Negative

- i. Increased frequency of communication
- ii. Could perhaps focus on leadership development given her well rounded skillset.
- iii. Explain technical knowledge more

Tursunai

c. 3 Positive

- i. Initiative. Tursunai took the initiative to attend office hours and collect feedback from the TAs, and to find out more on how we can do the project.
- ii. Research skills. Tursunai researched how to implement LLM on her own.
- iii. Creative. Tursunai managed to implement the LLM, which is not easy.

d. 3 Negative

- i. Could keep more team members in the loop
- ii. Explain technical knowledge more
- iii. Better structuring of ideas

Afag

e. 3 Positive

- i. Perseverance. Afag worked on the RDS portion, which encountered many errors. However, she did not give up.
- ii. Collaborative. Afag was willing to help anyone that required help.
- iii. Patient. As mentioned, she was very patient in solving the issues and managed to keep calm.

f. 3 Negative

- i. Could give more updates, enhancing her communication skills more.
- ii. Could keep more team members in the loop
- iii. Better presentation to enhance her ideas

Rishika

g. 3 Positive

- i. Detail oriented. Rishika manages to spot the small things that we miss and brings it up to the team.
- ii. Technical skills. Rishika is very competent in technical skills.
- iii. Research. Rishika managed to research and deploy the apprunner, which is a difficult task.

h. 3 Negative

- i. Could give more frequent updates
- ii. She can become more organised in her approach
- iii. Could further empower us by taking on a leadership role

## **Final Team Reflection**

Before starting to work on the project, we didn't know what approach to take because the idea seemed so massive and challenging to implement. After consulting the TAs and Prof. Gift, we received an initial sense of direction about how the different parts of our service would interact with each other. In our meetings, we started to plan and break up our project into smaller, more achievable tasks, and also began researching different AWS components, how to work with Claude, and how to use Flask. Despite the fact that none of us had any previous experience with any component of this service, we were fully dedicated to accomplishing the project because the idea was so interesting to us. We leaned on each other substantially to discuss our ideas, blockers, challenges, and findings as soon as they arose. Our final meeting went very well, and we were able to appreciate each other for contributing evenly to the work for ensuring that each meeting always yielded good progress. The majority of our project outcomes were produced during the team meetings collaboratively, and we visited two office hours sessions to refine our project idea and cloud architecture. Each member of the team also took full responsibility and ownership of different areas, showing respect to each other's pace on their tasks. We would also like to give a big shoutout to all of the TAs for always being ready to help us debug, fix permission issues, and advise us on our roadmap.
